

# BALAJI ROTO

SEPTIC TANK

Creates **Healthy Environment**

P4 BALAJI ROTO Septic Tank is designed to use as a Vertical Septic Tank with latest developed attachments inside. P4 BALAJI ROTO Septic Tank Polyethylene in a single mould. The unique size of Polyethylene Septic Tanks play a very important role in processing waste.

There are manhole provided for convenience. The high wall thickness withstands load and pressure of the earth to a great extent. It is easy to transport and install. P4 BALAJI ROTO Septic Tank are made in salt resistant, nondegradable plastic, hence they are more suitable in saline areas. All that has to be done for installing the tank is to fill 70% of the tank with water and connect the drain line to the inlet & outlet to the soak pit. Cover the manholes with lids provided and tank is ready to use.

ADVANCED

## Features : ✓ 100% Non-Corrosive

- ✓ Can Be Shifted
- ✓ Toilet waste seepage Leak Proof
- ✓ Durability Guaranteed
- ✓ Easy adaptable anywhere
- ✓ Helps in waste water saving.
- ✓ Easy to Install
- ✓ Environment friendly
- ✓ Can be Fitted in Small Area
- ✓ 100 % Eco-friendly, Excellent performance through massive reduction of BOD
- ✓ Bad Smell Free (Oduorless)
- ✓ Treat 50% wastewater through anaerobic treatment it generate lot of water for Non-potable use like irrigation / Farming
